

JIMWELL CALMA

Mobile Developer | Full Stack Developer

Angeles City, Philippines | jimwellwork28@gmail.com | jimwell-portfolio.vercel.app
github.com/JimwellC | linkedin.com/in/jimwell-calma

Magna Cum Laude BS Information Technology graduate (Web Development) building native iOS, cross-platform mobile, and full stack web applications. Shipped a solo-built native iOS app now in App Store review, a real-time auction marketplace with 25,000+ lines of strictly typed TypeScript, and two production systems for a paying client. Comfortable owning products end to end, from database and API design to mobile UI and deployment.

ACCOMPLISHMENTS

- Graduated Magna Cum Laude, BS Information Technology, Holy Angel University (April 2026).
- Built and submitted aigos, a native SwiftUI iOS app, to the Apple App Store (currently in review); solo-developed Auxtion, a live auction platform with sub-10ms real-time bid fan-out.
- Delivered two production applications to a paying freelance client, including a TikTok live selling SaaS used in real broadcasts.

CORE PROFICIENCIES

Mobile: Swift, SwiftUI, SwiftData, React Native (Expo), Flutter, Dart, iOS & Android delivery

Frontend: TypeScript, JavaScript, React, Next.js, Angular, Tailwind CSS

Backend: Node.js, NestJS, REST APIs, WebSockets, Socket.IO, PostgreSQL, Prisma, Redis, MongoDB, Firebase

Cloud & Tools: Microsoft Azure, Vercel, Railway, Git, Jest, Sanity CMS, Solidity

PROFESSIONAL WORK EXPERIENCE

Freelance Full Stack Developer

April 2026 – Present

Independent Client Work, Remote – Philippines

- Built Fad Fashiown, a TikTok live selling SaaS for a paying client: real-time order capture during live broadcasts using NestJS, WebSockets, PostgreSQL, and Redis, integrated with the OBS WebSocket API and ESC/POS receipt printing.
- Delivered Fad Élan (fadelan.com), a production luxury pre-loved bag catalog for the same client: Next.js 15, TypeScript, Sanity CMS v3, and Tailwind CSS v4, deployed on Vercel with Resend email and iron-session auth.

Software Engineering Intern - Hooli Software

June 2025 – September 2025

Remote – Philippines

- Developed features for DiSH Dashboard, a Microsoft internal tool for Compass Group serving 165 cafeterias and 50,000+ daily users, using Angular, TypeScript, and Microsoft Azure.
- Implemented WCAG 2.1 AA accessibility standards across dashboard components in a fully remote, distributed team.

PROJECTS

aigos - iOS Fuel Trip Cost Calculator (App Store, in review)

2026

- Solo-built native iOS app in SwiftUI and SwiftData that calculates exact fuel costs for Philippine road trips fully offline, using bundled OSRM routing over OpenStreetMap data with a zero-backend, privacy-first design.
- Integrated on-device AI via Apple's Foundation Models framework (Apple Intelligence) with runtime capability gating and a smart driving profile that adapts estimates to the user's driving style.

Auxtion - Live Auction Marketplace

January 2026 – Present

- Solo-built real-time auction platform for the Philippine market: React Native (Expo) mobile app with a NestJS 11 backend, Prisma/PostgreSQL, Redis pub/sub, and Socket.IO achieving sub-10ms bid fan-out.
- Implemented JWT authentication, role-based access control, live video via 100ms, and a hybrid PayMongo/GCash payment layer; 25,000+ lines of strictly typed TypeScript deployed on Railway.

ReachAble - Emergency App for PWDs (Capstone)

January 2026 – March 2026

- Led a team of four building a Flutter/Dart emergency assistance app for persons with disabilities.

InternProof - Blockchain OJT Verification

March 2026

- Built on-chain internship verification with Next.js and Solidity on Ethereum Sepolia; live at internproof.vercel.app.

EDUCATION & CREDENTIALS

BS Information Technology, Major in Web Development - Magna Cum Laude

April 2026

Holy Angel University, Angeles City, Philippines
